

## Policy – CISS Support by Age Group

---

Support is provided to children aged 0-6 through the traditional model. This support includes an intake process with families and ongoing communication with parents, including transition to school information and training.

From 7-12 (or grades 1-6), the support is provided directly to the child care centres, through a program-based support model. Consultants continue to visit regularly and to provide strategies, toys and equipment. Individual children are no longer on caseloads and communication between the family and the consultants is arranged through the program.
