NUTRITION	Nutrition to me is including all the components of a balanced diet, such as Vitamins, Proteins, Carbohydrates, Fats, Minerals, Fibre, including appropriate food quantities. On a regular basis I do not use preservatives and saturated fats in my diet. I personally do not like cooking unhealthy meals. I use fresh vegetables, fruits and fresh cooked soups and lentils.		

EXPERIENCE / TRAINING	<ul style="list-style-type: none"> • 2 years of working experience with Catholic Child Care Cooperation, age group pre- school, kindergarten and school-age • 4 Years of volunteer experience as language and dance instructor • Masters in Physical Education and Degree in Education • Diploma in Early Childhood Education • Registered Early Childhood Educator
PHILOSOPHY	<p>In the world of Early Childhood Education, I believe in building trust, respect and secure relationships with children and families. Children are capable, pure souls, energetic, competent to learn and explore in a secure, and caring environment, that promotes their learning and overall development. Children are curious, creative, full of wonder, imaginative, with unique ideas and brilliant brains, they need to explore to discover and learn to make their own world. Children learn by playing, The educator needs to know their interests to display age appropriate activities. I personally believe educators learn from children every movement while directing them.</p> <p>An educator needs to participate in activities to encourage, to support and to build a trustful relationship with children. An educator should provide materials for open ended activities without expecting desired results. Children should be allowed to take risks to know their strengths and gain confidence under their supervision. The transitions and routines should be simple and smooth to support their learning. Developing effective classroom routines for safe, smooth and successful transitions, frequent reminders, display routine charts, songs and rhymes are very helpful during transitions, at the same time should ask children what would be next to help them to memorise routine.</p> <p>The indoor and outdoor activities should allow children to develop physical, social, emotional, communication, language, literacy, cognitive and intellectual domains. As an educator, I will do effortless care to develop each child's knowledge, strengths, skills and will provide them a home-like safe environment.</p>

NOTES:

Curiously and positively looking forward to meeting families and children, it has been so long I am missing that wonderful environment, also our daughter will get partners to play with.
